

**PUBLIC HEALTH RESPONSES**

**Request #79** - Please provide a quantitative risk assessment of the fruit and vegetable ingestion pathway for all appropriate toxic air contaminants emitted from the three sources listed above.

**Response #79** - We are in the process of revising the screening level risk assessment for the project to include fruit and vegetable ingestion. This analysis will be submitted to the CEC by March 13, 2002.

**Request #80** - Please provide a quantitative risk assessment of the nursing pathway for PAHs emitted from the three sources listed above.

**Response #80** - The Health Risk Assessment Program summary tables included in Appendix K-9 of the AFC include the quantitative risk assessment for the nursing pathway for the PAH emissions expected for the IEEC project. See columns "MMilk" on pages K.9-17 and K.9-18.
